

Am I able to use the Online Curriculum Organiser with Firefox or Chrome?

While you can perform all other file management tasks using Firefox or Chrome, to open a document in Microsoft Word requires ActiveX which is only supported in Internet Explorer. Mozilla is addressing this issue and will hopefully resolve it in their next release, but for now, try one of the following add-ons:

Try a Compatibility Add-On

It is not guaranteed that these will work, but they will allow you greater access to the *Online Curriculum Organiser*

. The following add-ons enable you to display pages in *Internet Explorer mode*

Firefox

Chrome

[IE Tab](#)

[IE Tab](#)

[IE View](#)

** Please note that we are not affiliated with the Add-Ons or their Developers in any way, so please refer to the Developer's website if you have any trouble with the extension.*
